DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0 967 636 to Rengarajan. As seen, for example, in Fig. 1F of the reference to Rengarajan, an FET structure is formed where trenches are formed between PFET and NFET transistors, and where some of the trenches have a nitride liner (26) present, while other of the trenches have sidewalls which are void of any nitride liner.

Notice that the small trench (second from the right) in Fig. 1F has the nitride liner (26) covering the both sides and bottom of the trench, while adjacent trenches have some sidewalls which are void of the nitride liner, as claimed. For example, Fig. 3 shows a PFET device where the sidewalls of the trenches that adjoin the PFET are void of any nitride layer, as claimed.

Rengarajan also teaches that the thickness of the nitride layer may be of the same order of magnitude as that claimed.
